

### Radiology Equipment

1. Table surfaces where the animal has been MUST be immediately cleaned and disinfected. Spray with \_\_\_\_\_(disinfectant and strength)\_\_\_\_, wipe down and let dry. If possible do not use the table until the following day and spray down once more before leaving for the night. Leave a sign stating that the area is contaminated so it is not used after hours.
2. Spray or mop floor with \_\_\_\_\_(disinfectant and strength)\_\_\_\_when contaminated, allow to stand for \_\_\_\_\_(manufacturer recommended contact time)\_\_\_\_\_.
3. Disposable items are to be placed in a biohazard bag or in double bagged garbage bags, placed in a biohazard container and with an infectious waste label. The biohazard bin can then be sent for incineration/disposal.
